

Course Competencies and Objectives

Upon completion of this activity you should be able to:

- Describe the anatomy, cytology, histology, and colposcopic findings of the normal and abnormal cervix, vagina, and vulva;
- Elicit and document an appropriate history including risk factors for lower genital tract neoplasia;
- Understand the pathophysiology of lower genital tract neoplasia, including the role of oncogenic HPV in preinvasive and invasive diseases of the cervix, vagina, and vulva;
- Apply new standards for cervical cancer screening, including HPV testing;
- Describe the prevention of cervical neoplasia and genital warts using prophylactic HPV vaccines;
- Discuss the challenges of colposcopy and management of cervical neoplasia for selected patient populations, such as adolescents, women infected with HIV, underserved women, and pregnant women;
- Perform appropriate cytologic sampling, colposcopic evaluation, and biopsies (including endocervical sampling), and become familiar with instrumentation and necessary supplies;
- Understand the Bethesda System of cervicovaginal terminology;
- Recognize the diagnostic characteristics of cervical abnormalities (low-grade and high-grade cervical lesions as well as adenocarcinoma in-situ and cervical cancer) on cytologic, colposcopic, and histologic exam;
- Interpret and correlate cytologic, colposcopic, and histologic results;
- Formulate a plan of care for the management of women with Pap test abnormalities according to the most recent ASCCP Consensus Guidelines, the ASCUS/LSIL Triage Study (ALTS), and other evidence-based guidelines;
- Implement treatment options to include cryosurgery and electro-surgical loop excision procedure (LEEP) of the cervix;
- Understand the diagnosis and management of vulvar and vaginal neoplasia; and,
- Provide appropriate patient education and support.

Continuing Medical Education

Is this educational activity right for me?

This course has been developed for the beginning/intermediate colposcopist. This course is also of benefit to clinicians who received their initial training 5 years ago or more and thus need an update as to changes based on the NCI ALTS data, the 2006 national *Consensus Guidelines for the Management of Women with Abnormal Cervical Screening Tests and the Management of Women with Cervical Intraepithelial Neoplasia or Adenocarcinoma In-Situ*, and new concepts about HPV screening and triage, treatment methods, and HPV epidemiology. It is designed to improve medical knowledge, practice-based learning, patient outcomes, and systems-based practices. The participant should be a licensed physician or advanced practice clinician who has attained an advanced clinical degree from an accredited institution.

Course Educational Methods

Lectures: Each day, the participants attend general sessions designed around the Society's published Comprehensive Colposcopy Curriculum, which details the necessary and basic principles considered the foundation of knowledge required to evaluate, diagnose, and manage lower genital tract disease in women. Each session concludes with a question and answer period led by the presenter(s).

Pattern Recognition/Case Sessions: Breakout sessions provide intense and interactive exposure to multiple cervical images to help sharpen colposcopic assessment skills. Over 500 different cervical images are presented during the span of a given course, allowing participants to practice assessing for adequacy of exam, presence or absence of disease, and grading of abnormalities with direct feedback provided by the faculty.

Hands-on Sessions for the Colposcopy Procedure, Biopsy Techniques, and LEEP and Cryosurgery Techniques: Interactive hands-on breakout sessions on the techniques and procedures used in colposcopy and the management of lower genital tract disease are presented. Under the direct supervision of faculty, participants participate in structured simulations to perform these techniques.

Continuing Medical Education (cont.)

ACCME Accreditation

The American Society for Colposcopy and Cervical Pathology is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

The ASCCP *Comprehensive Colposcopy* course was planned and produced in accordance with the ACCME's *Essential Areas and Elements* and Updated Criteria (see www.accme.org).

Continuing Medical Education Credits

ASCCP — The American Society for Colposcopy and Cervical Pathology designates this educational activity for a maximum of 22.5 *AMA PRA Category 1 Credit(s)*[™]. The ASCCP also designates this session for a maximum of 22.5 Category 1 credits toward the ASCCP Program for Continuing Professional Development.

Each physician should only claim credit commensurate with the extent of their participation in the activity.

ACOG — The American College of Obstetricians and Gynecologists has assigned up to 24 cognate hours (Formal Learning) of the ACOG Program for Continuing Professional Development for this program.

AAFP — Application for CME credit has been filed with the American Academy of Family Physicians. Determination of credit is pending.

NPWH — This activity has been evaluated and approved by the Continuing Education Approval Program of the National Association of Nurse Practitioners in Women's Health for 22.5 contact hours of continuing education credit. Each advanced practice clinician should claim only those credits that he/she actually spent in the activity.

Instructions for Obtaining Continuing Medical Education Credit

To complete this program successfully and receive credit and a certificate of attendance, participants must follow these steps:

- Sign in each day at the ASCCP registration desk and attend lectures and workshops;
- Read the educational objectives;
- Review and utilize the course syllabus;
- Complete the pre- and post-test found online at www.asccp.org; and,
- Read, complete, and submit the course evaluation form to the ASCCP registration desk.
